HIGHLIGHT

The reef is located slightly north of Bathala and is approximately 360–400 meters long. The south side features several overhangs with beautiful “swim-throughs.” The reef top drops from about 5 meters to over 30 meters. Several coral blocks are scattered across the sandy bottom. On the eastern side, somewhat larger blocks lie just offshore.

Description

The reef is located slightly north of Bathala and is approximately 360–400 meters long. The south side features several overhangs with beautiful “swim-throughs.” The reef top drops from about 5 meters to over 30 meters. Several coral blocks are scattered across the sandy bottom. On the eastern side, somewhat larger blocks lie just offshore.

Since the site is located in a channel, sightings of large fish such as gray and whitetip reef sharks, tuna, barracuda, and eagle rays are not uncommon. But the schools of fusiliers are also quite impressive.
