The dive site is located in the southwest of Meemu Atoll and is offered as part of "2-tank dives" (travel time approx. 1.5 hours). It's particularly interesting between January and May, because during this time of year there's an outflow current, and with a little luck, you can spot manta rays.

Description

The dive site is located in the southwest of Meemu Atoll and is offered as part of "2-tank dives" (travel time approx. 1.5 hours). It's particularly interesting between January and May, because during this time of year there's an outflow current, and with a little luck, you can spot manta rays. There's also a good chance of seeing whitetip reef sharks, sea turtles, giant stingrays, and lots of schooling fish!
